Narrator: There are many amazing projects that help communities in Egypt Some of these projects help people, such as this one which helps people to gel fresh water, and some help the environment, like these volunteers taking rubbish from rivers.

Bossita is a company that organises! community projects. For example, the VenNiler projects help to clean the River Nile. They take lots of rubbish, such as plastic, from the river. They then recycle² the plastic. Some of the plastic they collect is going to become shopping bogs. Another project provides clean water for many people. The Makhad Trust helps people in the Sinai Peninsula.

They teach people to keep bees. These bees are going to make namey: which we use for food. The Makhad Trust also creates gardens so people can grow their own food.

Are there any community projects where you live? What do they do to help your community?

Good morning, everyone. I'd like to introduce muset. I'm Judy and I work for See the best of Cairo. Today, you're going to visit two places. They are not the most famous ones, but we think they are the best-! Why? Because they are neither full of tournsts nor expensive, but they have some very interesting things to see.

Firstly, in the morning, we're taking you to the Egyptian Railway Museum. It opens at 9 am. Here you'll find trains but also some other historical forms of transport, including planes. The museum is next

to Caro train station. Then, at about 2 pm, we're going to the House of Gamal Al-Din Al-Dahabi. This is one of the aldest houses in the city, but in the seventeenth century. It has beautiful windows, doors and event fountain. We know you won't be bored in either of these places!

Good afternoon, I'd like to make a complain What's the problem? . Tordered something from your website but it hasnt arrived Im very sort pabout that. What did you order? Ablack kellun? Why don't you come to our shop? We have one here . You don't have to pay anything more. 59.5... ا مرحه الكبرون Thank you Where is your shop? Its next to the museum. The camel is called the ship of the desert because it has the ability to stay alive in the desert without food and water for six to ten days. Came are able to stand the loss of about one third of their body liquid without feeling tired. Their noses, ears and eyes are formed in such a way that they are least affected by the dust of the desert. It is a very useful animal for desert travellers and they can carry enormous loads. It is commonly believed that a camel does not need food very regularly, but this is not correct. Because of its amazing body, it can store food and water for many days.

Wood from trees is used to make paper, furniture and other goods of daity use. As a result, a large number of trees are cut down every day to cover these needs.

Population means the total number of people living in a particular area. The world population right now stands at more than 7.8 billion. China and India are more than 35% of this population. China has the most populated country and India is taking the second position.

It was expected that the world population would reach one billion for the first time in 1804. It was 1927 before it reached two billion, but it took only 33 years to reach three billion in 1960. Now it only takes 12 to 13 years to add one billion people to the world. The food produced every year isn't enough for all people, and it becomes expensive.

Because of that, the prices of useful items increase. It leads to the pollution of water and air. To control the rate of population, different governments have taken a lot of steps around the world.

Reading for pleasure is different from reading you do for study. When you read for pleasure, you will not be tested for what you have read. You will not have to remember every detail. All you have to do is to enjoy what you have read. When you read for pleasure, you choose the book that you read. In England, people know that autumn arrives when apples begin to turn red in early September. Both red and golden apples are delicious. All through September and October the smell of apples fills the air on sunny days. You can get a fresh smell of apples and enjoy autumn scenery.

Adults pick the apples. Children shouldn't climb up on trees and risk hurting themselves and damaging the trees. The picking may not take long time just two hours at most. Many people like to watch the apple picking event as it is very interesting and they enjoy seeing fresh apples with their different colours. Young children also like to

Read the following text, then answer the questions:

Children are very dear to us. We all work hard and do our best to make them feel happy. So we must bring them up well to be good people. Bringing up children is a very hard task. There are three stages in bringing up children. The first stage is that just after birth. This stage needs good food and good cleanliness. The second stage is that of early childhood. It is very important and hard at the same time. This second stage needs playing games and making children learn new ways of life. The third stage is that of teenage. This third stage is very dangerous and critical as it needs to be accurate in dealing with children at that time. Any mistake made in any stage means a battle lost in the future.

When children are well brought up, they will be good people that are useful to society. On the other hand, if children were neglected, many problems will appear in society later on. So we must be very careful when we bring our children up.
